

Interior Design Minor

Interior designers are vital team members across a wide range of industries. These include residential development, commercial office planning, hospitality, healthcare, and retail design. Spatial composition and human-centric ergonomics are at the core of the interior design curriculum, balancing materiality, aesthetic harmony, and functional requirements. Courses unite a unique combination of technical drafting, sourcing, 3D modeling, and experiential opportunities

The minor consists of a minimum of 15 Credits. Select at least one course from each category and at least 9 credits must be 300 level or above.

Category A: Design Context

Code	Title	Credits
