Computational Mathematics Concentration

B.S. in Mathematical Sciences, Computational Mathematics Concentration

(120 credit minimum)

First Voar			
1st Somostor		Credits	
MATH 111	Calculus I	4	
CS 100	Roadmap to Computing	3	
ENGL 101	English Composition: Introduction to Academic Writing	3	
PHYS 111	Physics I	3	
PHYS 111A	Physics I I ab	1	
FYS SEM	First-Year Student Seminar	0	
	Term Credits	14	
2nd Semester			
MATH 112	Calculus II	4	
Social Science GER	(http://catalog.njit.edu/undergraduate/academic-policies-procedures/general-education-requirements/social-	3	
PHYS 121	Physics II	3	
PHYS 121A	Physics II Lab	1	
ENGL 102	English Composition: Introduction to Writing for Research	3	
	Term Credits	14	
Second Year			
1st Semester			
MATH 213	Calculus III B	4	
MATH 333	Probability and Statistics ¹	3	
MATH 337	Linear Algebra	3	
Select one of the following:		3	
PHYS 234	Physics III		
CHEM 125	General Chemistry I		
BIOL 200	Concepts in Biology		
History and Humanities GER 200 level (http://catalog.njit.edu/undergraduate/academic-policies-procedures/general-education- 3 requirements/ger-200-level/)			
	Term Credits	16	
2nd Semester			
MATH 222	Differential Equations	4	
MATH 340	Applied Numerical Methods	3	
History and Humanities GER 300+ level (http://catalog.njit.edu/undergraduate/academic-policies-procedures/general-education- requirements/ger-300-level/)			
Application Elective		3	
Free Elective		3	
	Term Credits	16	
Third Year			
1st Semester			
MATH 331	Introduction to Partial Differential Equations	3	
MATH 391	Numerical Linear Algebra	3	
MATH 480	Introductory Mathematical Analysis	3	
Application Elective		3	
History and Humanities GER 300+ level (http://catalog.njit.edu/undergraduate/academic-policies-procedures/general-education- 3 requirements/ger-300-level/)			

2nd Semester

	Total Credits	120
	Term Credits	15
Free Elective		3
Technical Elective		3
Math 300+ Elective		3
MATH 453	High-Performance Numerical Computing	3
MATH 451	Methods Appl Math II	3
2nd Semester		
	Term Credits	15
Humanities and Soc general-education-re	ial Science Senior Seminar GER (http://catalog.njit.edu/undergraduate/academic-policies-procedures/ equirements/hss-capstone/)	3
Free Elective		3
Technical Elective		3
MATH 450	Methods Of Applied Math	3
MATH 448	Stochastic Simulation	3
1st Semester		
Fourth Year		
	Term Credits	15
Technical Elective		3
Application Elective		3
MATH 478	Stat Methods in Data Sci	
MATH 447	Applied Time Series Analysis	
MATH 344	Regression Analysis	
MATH 341	Statistical Methods II	
Select one of the fol	lowing:	3
MATH 440	Advanced Applied Numerical Methods	3
MATH 332	Introduction to Functions of a Complex Variable	3

¹ Students may substitute MATH 244 (https://catalog.njit.edu/search/?P=MATH%20244) Introduction to Probability Theory, with advisor approval.

General Education Requirements

All students are required to satisfy the General Education Requirements (GER). All GER courses should be selected in consultation with a faculty advisor in the Department of Mathematical Sciences. Refer to the General Education Requirements (https://catalog.njit.edu/undergraduate/academic-policies-procedures/general-education-requirements/) section of this catalog for further information on electives.

Co-op Courses

In Mathematical Sciences, the co-op courses, MATH 310 (https://catalog.njit.edu/search/?P=MATH%20310) Co-op Work Experience I and MATH 410 (https://catalog.njit.edu/search/?P=MATH%20410) Co-op Work Experience II, bear degree credit and count as technical or free electives, subject to approval by a faculty advisor in the Department of Mathematical Sciences.

Electives

All mathematics, technical, and free electives should be selected after consultation with a faculty advisor in the Department of Mathematical Sciences. Any mathematics course numbered 331 or above may be used as a mathematics elective. Any course at or above the 100 level having a significant mathematical and/or scientific content may be used as a technical elective. Any course at or above the 100 level may be used as a free elective.

Application Electives

Students are required to take 9 credits of application elective courses in a single area of specialization. Possible areas of specialization for application elective courses include: Biology, Chemistry, Computer Science, Economics/Finance, Physics, Statistics. Students interested in computer science are encouraged to consider the double major program.

This curriculum represents the maximum number of credits per semester for which a student is advised to register. A full-time credit load is 12 credits. First-year students are placed in a curriculum that positions them for success which may result in additional time needed to complete curriculum requirements. Continuing students should consult with their academic advisor to determine the appropriate credit load.
